

ONE

Professionally create, view, and edit PDF documents. **e-PDF Professional** gives you full control over your PDFs-- all the way from creation, editing and reviewing to preparing, and then sharing them with workgroups and clients.

## Working with e-PDF

1. One of the few programs available that allow you to actually edit PDF files
2. Full control over the look and feel of your documents
3. Ability to convert any "Suite" file into PDF's.
4. Add PDF bookmarks and hyperlinks to your document.
5. Mark-up, add drawings, review and exchange PDF documents from any file format
6. Create and fill in your own PDF forms
7. Move and resize images, move or edit text, delete unwanted elements, add additional images or text, add or remove pages, and reorganize the arrangement of objects in the document.
8. Add text to PDFs with much of the functionality of a standard word processor, including multiple fonts, font sizes, font colors, background colors, different kerning.
9. Includes basic drawing functions for adding in boxes, ovals, lines, and other shapes to a PDF.
10. Insert images (bitmaps, jpegs, gifs, and .pngs) into a PDF, as well as tables, graphs, and OLE objects.

## Features & Benefits

Do it all with just the one application. e-PDF Professional lets you: Create a PDF from any application in "The Suite" , from any Microsoft® product or practically any other software you are using because e-PDF easily converts more than 100 file types to PDF.

Copy, edit, and add text, graphics, or whole pages. Add automatic page numbering and date and time stamps. Add navigational aids like bookmarks and hyperlinks and fill-in and create your own PDF forms. For business users, e-PDF lets you markup and review documents using notes, highlighting, comments, and drawing tools.

Configure security settings, and control others' ability to print, edit, and/or copy your work.
