

SuperCalc is the single most powerful and feature rich software calculator available in the market today. Its easy-to-use interface, and advanced features, such as; **the ability to toggle between a basic or scientific calculator, tape display, voice read back, point of sale, and full function set including over 50 pre-defined financial functions;** makes SuperCalc a terrific choice for anyone.

Function - Financial Calculations

SuperCalc is a full-featured financial calculator that boasts over 50 financial functions and can guide you through the process of doing a vast range of common financial calculations using a very simple, user-friendly interface. Even users who know next to nothing about organizing finances can calculate loan payments, nominal and effective interest rates, annuities etc.

Function - Math and Statistics

SuperCalc guides you through the process of calculating averages and standard deviations, calculating correlation coefficients, for performing Chi-squared statistical analysis, generating Fibonacci or Arithmetic series, generating random numbers and verifying prime numbers.

Feature - 4 Main Modes

Basic

Standard calculator mode

Scientific

Performs a wide variety of advanced mathematical functions, such as exponents, square roots, factorials, logarithms, trigonometry, etc

Allows for advanced Formula input using brackets, fractions, and even algebraic variables. You can display your results with either standard or scientific notation.

Adding Machine

SuperCalc can be set to work as an adding machine for book-keeping

Point-of-Sale

Set up SuperCalc as a full screen Point of Sale Device so that it operates as a cash register. Includes department numbers and multiple taxation systems

Function - Constants, Time, Units, etc

Math - Includes many constants for performing complex mathematical calculations, such as pi, e, euler-mascheroni constant, golden mean, catalan's constant, to name a few.

Time - Includes a time calculator that can convert times between decimal, and hours-minutes-seconds formats, and compute elapsed times.

Retail - Easily calculate cost prices, selling prices, and margins. SuperCalc also has a feature that allows you to choose a percentage method.

Currency - SuperCalc allows you to easily convert between multiple currencies.

Unit - SuperCalc can act as a unit converter and can convert temperatures, lengths, areas, weights, volumes, and liquid capacities.
